Aden services

— Delivering safe, compliant, and uninterrupted operations across hospitals and senior-care facilities

Integrated Facility Management for Healthcare

Expertise in healthcare operations

For 30 years, Aden has provided integrated facility management to hospitals and senior-care facilities. We strictly enforce healthcare-grade safety and hygiene standards across all daily operations–from cross-contamination control to critical engineering–ensuring uninterrupted clinical continuity.

Through fully digitalized workflows, we offer clear data visibility and full traceability to give healthcare leadership total oversight. Paired with certified, compassionate service teams, we safeguard patient safety, dignity, and care experience every day.

Key IFM service scope for healthcare facilities

Healthcare Cleaning Services:
Standardized cleaning aligned with infection-prevention protocols, HAI management, and color-coded cross-contamination control.

Catering Services:
Patient dining and staff meals prepared to HACCP standards. Therapeutic diet programs planned and delivered by certified nutritionists.

Security Services:
Trained officers, fire safety, and 24/7 surveillance to protect people, assets, and clinical operations.

Hard Services:
Predictive and scheduled maintenance for HVAC, medical gases, power, and other critical systems.

Central Portering Services:
Safe, efficient patient transport across all clinical departments. Secure handling and delivery of specimens, medications, and medical supplies.

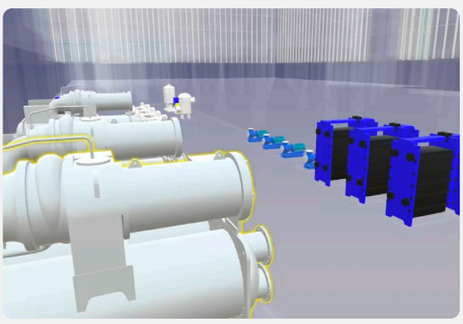
Integrated Facility Management:
One accountable partner coordinating all of the above, with a single point of contact.

What sets Aden's healthcare IFM apart

> Generic facility management is not enough in healthcare. Aden's approach is built on three healthcare-specific capabilities that go beyond standard FM.

Cross-contamination control

- Color-coded zoning from clean to contaminated areas
- Mandatory HAI training & daily disinfection protocols
- Terminal disinfection & medical-waste handling protocols



Smart clinical infrastructure

- Akila predictive maintenance for HVAC, gases & power
- Digital traceability for automated medical-waste management
- Central portering for routine & emergency care

Certified people & processes

- First-aid trained technicians & HACCP-certified catering
- 24/7 on-site emergency response engineers
- IPC-certified processes, compliance audits & safety drills

Through integrated facilities management, we help hospitals transform complex operations into a safe, compliant, and predictable long-term system. By aligning people, processes, and systems, we ensure continuous clinical operations.

Sustained improvements delivered by healthcare IFM

Trusted experience across hospitals and senior care

Client cases

Shanghai Meifuyouji Clinic

Partnership Duration:
2021 – Present

Service scope:
Specialized cleaning services for a clinical environment

Shanghai Bright Eye Hospital

Partnership Duration:
2024 – Present

Service scope:
Public-area and specialized cleaning services for the hospital

Hangzhou Stomatological Hospital

Partnership Duration:
2018 – Present

Service scope:
Catering services for over 400 medical professionals across three designated campuses.

With mature IFM frameworks and healthcare-certified teams, Aden keeps hospital and senior-care facilities running smoothly, safely, and efficiently. We handle complex daily operations with clear data transparency–ensuring full compliance so clinical staff can focus entirely on patient care.
