DISINFECTION & HYGIENE SOLUTIONS

Aden

Pre-opening disinfection services

In view of the current coronavirus crisis and related developments, the safety assurance of your work place and your employee is essential to prevent the virus brought by the workers and people outside the company upon resumption of work.

Special cleaning, sanitation and disinfection measures is a MUST to be implemented as recommended by the latest government regulations.

Continuous disinfection & hygiene services

The Continuous disinfection program will further assure an efficient strong monitoring and implementation of the Cleaning and disinfection process.

Essential Benefits:

- Maintain and keeping a clean environment within the controlled premises and facilities.
- High-resistant to avoid any future contamination.
- Keep high level of the awareness of the people that psychologically will influence other people in keeping high standard hygiene practices

Consumable procurement

- Disinfectants - chlorine-containing disinfectants, wash-free disinfectants recommended Disinfecting
- Equipment - sprayers
- Personal protective supplies - disinfection personnel wear masks (medical protective masks), rubber gloves, disposable protective clothing, protective glasses, cleaning supplies, etc. Forms for communication tools, registration, records
- Disinfecting cleaning car - equipped with sanitized buckets, rags, floor-to-earth, alcohol spray pots and other cleaning supplies

Hazardous waste solutions

Key role at the end of the disinfection process and operation is very important as we are managing bactericidal, fungicidal, and virucide preventive measures.

Indicate the specific waste bags and specific method of transporting at the end of the process. For infection & similar risks the waste bag have to be "yellow" - or stick the logo on the bags if the yellow ones are not available
